

UFO SIGHTING/CRASH-SITE WITNESS QUESTIONNAIRE AND REPORT FORM & SP-23 Close Encounter Type Expansion Classification

'The Modern UFO/UAP Researcher's Handbook'
<https://www.UFOCurrents.com>

INVESTIGATOR / RESEARCHER	
Name:	
Date/Time:	
Location:	

WITNESS INFORMATION

Name(s):

Observer Level: [] Civilian [] Government/Military [] Other

(Please Specify): _____

Contact Information (Phone/Email):

Anonymity: [] (Witness does not wish to have information shared.)

DATE TIME DETAILS

Date of Sighting/Incident: _____, _____, _____
MONTH DAY YEAR

Time of Sighting/Incident: _____, _____, _____
LOCAL TIME AM/PM TIME ZONE

GMT, (Greenwich Mean Time): [] Yes [] No _____

LOCATION DETAILS

Location of Sighting/Incident (Include Address or Coordinates):

GPS Location Longitude: _____

GPS Location Latitude: _____

GPS Location Altitude: _____

Surrounding Environment (Rural, Urban, Near Water, etc.)

<input type="checkbox"/> Rural Area <input type="checkbox"/> Urban Area <input type="checkbox"/> Suburban Area	<input type="checkbox"/> Near a River <input type="checkbox"/> Near a Lake <input type="checkbox"/> Near the Ocean	<input type="checkbox"/> Wooded Area <input type="checkbox"/> Desert Area <input type="checkbox"/> Mountainside
<input type="checkbox"/> Valley <input type="checkbox"/> Farmland <input type="checkbox"/> Industrial Area	<input type="checkbox"/> Residential Neighborhood <input type="checkbox"/> Near an Airport <input type="checkbox"/> Park or Recreational Area	<input type="checkbox"/> Near a Military Base <input type="checkbox"/> Wilderness Area <input type="checkbox"/> Coastal Area
<input type="checkbox"/> Forested Area <input type="checkbox"/> Remote Location <input type="checkbox"/> Near a Power Plant	<input type="checkbox"/> Near a Volcanic Region <input type="checkbox"/> Near a Dam or Reservoir <input type="checkbox"/> Near a Quarry or Mining Site	<input type="checkbox"/> Island or Peninsula <input type="checkbox"/> Near a Railroad <input type="checkbox"/> Near a Highway or Freeway
<input type="checkbox"/> Near a Hospital or Medical Facility <input type="checkbox"/> Near a Port or Harbor <input type="checkbox"/> Near a School or Campus	<input type="checkbox"/> Near a Shopping Center or Mall <input type="checkbox"/> Near a Sports Stadium or Arena <input type="checkbox"/> Near a Religious Institution	<input type="checkbox"/> Near a Government Building or Facility <input type="checkbox"/> Near a Historical Landmark or Site <input type="checkbox"/> OTHER

Provide Details: _____

Weather and Visibility Conditions (Clear, Cloudy, Rainy, Foggy, etc.)

<input type="checkbox"/> Clear	<input type="checkbox"/> Foggy	<input type="checkbox"/> Partly Cloudy
<input type="checkbox"/> Cloudy	<input type="checkbox"/> Snowy	<input type="checkbox"/> Hazy
<input type="checkbox"/> Rainy	<input type="checkbox"/> Overcast	<input type="checkbox"/> Stormy
<input type="checkbox"/> Misty	<input type="checkbox"/> Showers	<input type="checkbox"/> Icy
<input type="checkbox"/> Smoggy	<input type="checkbox"/> Drizzle	<input type="checkbox"/> Dusty
<input type="checkbox"/> Thunderstorm	<input type="checkbox"/> Sleet	<input type="checkbox"/> Windy
<input type="checkbox"/> Tornado	<input type="checkbox"/> Hurricane	<input type="checkbox"/> OTHER

Provide Details: _____

Observation Type (Ground-Visual, Air-Visual, Radar, etc.)

<input type="checkbox"/> Ground-Visual	<input type="checkbox"/> Satellite	<input type="checkbox"/> Night Vision
<input type="checkbox"/> Air-Visual	<input type="checkbox"/> Underwater	<input type="checkbox"/> Thermal Imaging
<input type="checkbox"/> Radar	<input type="checkbox"/> Infrared	<input type="checkbox"/> Astronomical Telescope
<input type="checkbox"/> Drone/UAV	<input type="checkbox"/> Magnetic Anomaly Detection	<input type="checkbox"/> Spectroscopy
<input type="checkbox"/> Space Telescope (e.g., Hubble)	<input type="checkbox"/> Electromagnetic Spectrum Analysis	<input type="checkbox"/> Sound Recording (Audio)
		<input type="checkbox"/> OTHER

Provide Details: _____

HYNEK CLASSIFICATION

CE1	[]	Description: UFOs are visually observed at a close range, typically within 500 feet, showcasing considerable detail and size.
CE2	[]	Description: Events involves a physical effect, such as interference with electronics, animal reactions, physical discomfort in observers, or tangible traces like ground impressions or scorched vegetation.
CE3	[]	Description: Involves sightings of animate entities, such as humanoids or robots, often perceived as pilots or occupants of the UFO.
CE4	[]	Description: Encounter involves human abduction by UFOs or their occupants.
CE5	[]	Description: Deliberate human-initiated communication with extraterrestrial or advanced interstellar entities.

The "SP-23 Close Encounter Type Expansion Classification" scale augments the traditional CE1 through CE-5 Hynek classifications by introducing additional categories that reflect contemporary understandings and experiences with UFO/UAP phenomena.

This scale seeks to encompass a wider range of encounters, including those that involve more subtle or complex interactions between humans and unidentified aerial phenomena.

CE6, Direct Communication	[]	<p>Description: CE6 cases involve witnesses reporting direct communication with entities connected to the UFO/UAP. This communication can manifest through telepathy, electronic devices, or other means, with an emphasis on non-verbal interaction, often involving the transmission of intricate ideas or emotions.</p> <p>Characteristics: Communication in CE6 cases is typically non-verbal and may encompass the exchange of complex thoughts or emotions.</p>
CE7, Biological Effects	[]	<p>Description: Incidents where there is direct physical interaction between the UFO/UAP and a witness, leading to biological effects such as unexplained injuries, physiological changes, or healing phenomena.</p> <p>Characteristics: Effects can be immediate or manifest over time; may include physical markings, altered health states, or psychological transformations.</p>

(continued)

<p>CE8, Transdimensional Interaction</p>	<p>[]</p>	<p>Description: Experiences suggesting interaction with entities or craft that appear to operate beyond conventional three-dimensional space and time, indicating possible transdimensional capabilities.</p> <p>Characteristics: Includes sightings of entities or objects appearing/disappearing suddenly, altering physical reality, or affecting the perception of time.</p>
<p>CE9, Environmental Manipulation</p>	<p>[]</p>	<p>Description: Cases where UFO/UAP presence leads to significant, often unexplained, environmental changes or anomalies, like alterations in weather, wildlife behavior, or landscape.</p> <p>Characteristics: Changes are localized and closely tied to the timing and location of the UFO/UAP sighting.</p>
<p>CE10, Collective Experience</p>	<p>[]</p>	<p>Description: Events where groups of people simultaneously witness a UFO/UAP and experience a shared reality alteration or a collective psychological impact.</p> <p>Characteristics: Often involves large groups and can include shared visions, altered states of consciousness, or simultaneous recollection of similar experiences.</p>
<p>CE11, Technological Interaction</p>	<p>[]</p>	<p>Description: Incidents that involve direct interaction between UFO/UAP and human-made technology, leading to significant and unexplained technological phenomena.</p> <p>Characteristics: Can include interference with electronic devices, unexplained technological failures, or advanced technological insights post-encounter.</p>
<p>CE12, Temporal Distortion</p>	<p>[]</p>	<p>Description: Experiences where witnesses report alterations in their perception of time, including time loss, acceleration, or other temporal anomalies associated with the UFO/UAP sighting.</p> <p>Characteristics: Time distortion is closely correlated with the presence or proximity of the UFO/UAP.</p>

DESCRIPTION OF THE SIGHTING/INCIDENT

Type of Sighting/Incident: [] Sighting [] Crash Site [] Other

Provide Details: _____

Number of Witnesses Present: _____

Distance from Object (If Applicable):

Duration of Sighting/Incident: _____

Description of the UFO (Shape, Size, Color, Lights, etc.):

Did the Object Emit Any Sound? (Yes/No):

Did the Object Display Any Unusual Movement? (Yes/No):

PHOTOGRAPHIC OR VIDEO EVIDENCE

Did you capture any photos or videos of the UFO or incident? [] Yes [] No

If yes, please provide details on the device used and share the media if possible.

ADDITIONAL WITNESSES

Names and Contact Information of Any Additional Witnesses:

OTHER ENVIRONMENTAL EFFECTS

Were there any environmental effects noted at the scene (e.g., vegetation changes, soil disturbances, radiation, burns, etc.)? (Yes/No):

EMOTIONAL/PHYSICAL EFFECTS

Did you or any witnesses experience any emotional or physical effects during or after the sighting/incident (e.g., nausea, headaches, anxiety, etc.)? (Yes/No):

POST-SIGHTING/INCIDENT OBSERVATIONS

Did you or any witnesses observe any military or government personnel at or near the scene after the incident? (Yes/No):

ADDITIONAL COMMENTS

Please use this space to provide any additional information, comments, or questions related to the sighting or incident:

Disclaimer & Notes: This form serves as a critical component of this UFO Sighting/Crash-Site Witness Questionnaire and Report Form. It is essential to obtain accurate and detailed information from witnesses to ensure the credibility and validity of the reported UFO sighting or crash-site incident. We kindly request that witnesses provide truthful and comprehensive details about themselves, their contact information, and their background.

Please be aware that the information shared will be treated with the utmost confidentiality and used solely for the purpose of UFO research and investigation. In some cases, witnesses may prefer to remain anonymous, and we fully respect their private choices. This section serves as the foundation for the entire report, enabling investigators to reach out for clarifications, follow-ups, and additional information if necessary. Your cooperation and candidness are greatly appreciated as we work together to unravel the mysteries of the UFO phenomenon.

FOLLOW-UP ACTIONS

Effective follow-up actions are a critical component of any UFO investigation. Once an initial sighting or incident report has been submitted, the process of gathering, analyzing, and validating information enters a crucial phase. This is where investigators, researchers, and organizations dedicated to studying unidentified aerial phenomena (UAP) can make a substantial impact on unraveling the mysteries surrounding UFO sightings.

The importance of these follow-up actions cannot be overstated. They not only aid in corroborating witness accounts but also help in collecting additional evidence, analyzing environmental effects, and engaging with experts from various fields to gain valuable insights. In this section, we outline the recommended follow-up actions that should be undertaken after an initial UFO sighting report has been received.

The ultimate goal of these follow-up actions is to foster a cooperative and rigorous approach to the study of UFOs, encouraging collaboration among researchers, witnesses, and experts. By working together and adhering to these recommended steps, we move closer to uncovering the truths behind the enigmatic phenomena that have intrigued humanity for generations.

• • •

These follow-up actions will help ensure a systematic and thorough investigation of the UFO sighting, contributing to a more comprehensive understanding of the phenomenon:

- **Contact Witness:** After receiving the initial report, the investigator should promptly contact the witness to gather any additional details or clarification. Ensure that contact information is up-to-date.
- **Interview Witnesses:** If there were multiple witnesses, interview each one separately to avoid contamination of testimonies. Encourage them to provide their accounts and corroborate the details.
- **Secure Evidence:** If photographic or video evidence was provided, secure the original media and metadata. Ensure that the chain of custody is maintained.
- **Witness Anonymity:** Respect the witness's choice for anonymity if selected on the form. Assure them that their privacy will be protected throughout the investigation.
- **Environmental Analysis:** Conduct an analysis of the reported environmental effects, such as changes in vegetation, soil disturbances, radiation levels, burns, or any other anomalies. This may require site visits or remote sensing techniques.

- **Witness Well-Being:** Inquire about any physical or emotional effects experienced by the witness during or after the sighting. Recommend medical or psychological evaluations if necessary.
- **Expert Consultation:** Consult with experts in relevant fields, such as astronomers, meteorologists, or aviation specialists, to gain insights into the sighting. Share the report and evidence for their analysis.
- **Government/Military Liaison:** If the sighting involved military or government personnel, consider reaching out to the appropriate authorities for any available information or cooperation.
- **Data Analysis:** Analyze any sensor data, including radar, thermal imaging, or other types of measurements, if provided or available. Collaborate with experts in data analysis as needed.
- **Research and Investigation:** Conduct thorough research into historical cases or similar incidents to identify patterns or correlations. Investigate whether similar sightings have occurred in the same area.
- **Report Compilation:** Document all findings, witness testimonies, expert opinions, and investigative steps in a comprehensive report. Include any conclusions or potential explanations based on the evidence.
- **Scientific Collaboration:** Share the report with relevant scientific organizations or research institutions for further analysis and peer review.
- **Public Relations:** If the witness agrees, consider sharing the report with the public or media outlets, maintaining witness anonymity if requested.
- **Continued Monitoring:** Continue to monitor the area for any recurring sightings or phenomena. Maintain contact with the witness for updates.
- **Database Entry:** Enter the report and investigation details into a centralized UFO/UAP database for future reference and research.
